Stinson Lorelai | Stinson Batik

nyx

Nyx combines modern straight lines with soft curves to provide a softer aesthetic to modern spaces. Nyx is an innovative twist on the classic chesterfield style sofa. Designed by David Dahl, Nyx is a stunning collection perfect for any public space. Featuring both a 14" or an 18" seat height, Nyx provides gorgeous seating for the young and old.

Design

Nyx is a stunning modern piece, perfect for making a statement in any environment. With options of having a thick arm on one or both sides or even two thin arms, Nyx can become unique to each individual space. Nyx's options of USB and A/C Receptacles allow those seated to stay connected while comfortable. And round legs provide the perfect finishing touch.

Performance

All of the foam components are environmentally friendly and California TB117 compliant

India Tape is utilized in the seams to ensure Nyx is kept bed bug proof

Nyx's frame is constructed of solid Canadian hardwood with plywood components

All joins in the wood are glued and stapled to double the strength

Noise-canceling fabric is used to cover the back springs, to prevent unwanted squeaks and damage to the foam

Burch Fleck | Burch Atoll

Nyx Collection

Designed by David Dahl

Raised in Kent, Ohio, but professionally nurtured in Los Angeles, David combines Midwestern ideals with a coastal aesthetic. David fell in love with Furniture Design while studying Industrial Design at the University of Cincinnati. He graduated in 1984, then spent two years designing toys with a small firm in Venice, California. In the meantime, David devoted any free hours to designing and building furniture.

In 1986, David joined John Caldwell Design in Pasadena, California where he worked on many contract furniture projects.

In 1992, he launched Dahl Furniture, creating custom residential and office pieces, as well as designing for the contract market. His hands-on approach has made him a sought-after partner, building his own scale models and prototypes to ensure seating comfort.
